SIX DIGITAL EXCHANGE

The World's Leading Financial Market Infrastructure for Digital Assets

FINMA Regulated

Welcome to SIX Digital Exchange, the world's first fully regulated stock exchange and central securities depository (CSD) based on blockchain technology. SDX is revolutionizing the way financial markets operate, providing a seamless and secure platform for traders, broker-dealers, bankers, and corporations to explore the world of digital assets.

Today's well-established markets infrastructure has proven its efficiency and resilience over time. However, we recognize that certain areas still present challenges, including potential risks, cost considerations, and complexities that may hinder the realization of the next phase of sustainable market interaction and automation.

We believe in leveraging innovative solutions to address these limitations and create an environment that fosters seamless market growth and automation. With the evolvement of Distributed Ledger Technology and the Web3 transition, we now have the opportunity to

overcome these barriers and unlock new possibilities for market development.

Our Vision at SIX Digital Exchange Is to Pioneer This Change and Drive the Adoption of This Transformative Technology within the Global Institutional Space.

Through collaboration with capital market participants, we are building an ecosystem that redefines the future of financial markets infrastructure. Our state-of-the-art proposition empowers you to harness innovation, create groundbreaking products and shape the future of finance.

Join Us and Become a Part of the Evolving Landscape of Digital Assets.

SDX recognizes the transformative potential of digital assets and is dedicated to providing a reliable infrastructure that fosters liquidity, transparency, and efficiency in the digital securities ecosystem. Since going live in Q4 2021, SDX has been actively collaborating with partners and our members of the exchange and CSD. Together, we are committed to promoting and building a new market infrastructure for digital assets on a global scale. Whether you are an issuer seeking to tokenize your assets, a trader looking for a secure and transparent marketplace, or an investor interested in accessing digital securities, SDX is here to support you. Together, we can unlock new opportunities and drive the growth of this dynamic market.
